

Good afternoon and Happy New Year!

Just wanted to take a minute to tell you how much we appreciate having Clark Clowar assigned to our projects. I own Dynamic Space Solutions (a Facilities & Move Management consulting firm) and have had the privilege of working with Clark at Genoptix over the last ~8 years or so. While he's always done an outstanding job at keeping projects on schedule, within budget, and creating a safe working environment, this past year has been *extraordinary!*

Clark has to work within fully occupied lab spaces, keep the entire building functioning while doing intense levels of demo and construction, and keep everyone happy too. He consistently comes up with creative solutions, is great with communicating, and pleasantly and professionally handles any and all issues that come up. In addition to the lab projects, Genoptix recently had a whole slew of miscellaneous office TI's that needed to be accomplished quickly. Clark's ability to manage multiple sites, sub-contractors/trades, plus our client's ever-changing requests and timelines, is a testament to the skilled Superintendent he is. I think that a key component to the success of these projects is that Clark is on-site daily. It also lends itself to trusting that when new projects come up quickly, he already has the skills and the historical knowledge to make him a key player in the planning and implementation of a successful project.

Clark is a joy to work with and always goes out of his way to create and maintain a strong team, collectively on the same page and headed in the same direction. Thank you for assigning him to the Genoptix projects... he has been critical to our success! I don't know if you offer spot bonuses or specific accolades, but if so, Clark definitely deserves it!

Based on the good experience we've had with Reno/Clark, we have passed along your information to a few of our other clients. Perhaps we can work on additional projects with you in the future!

Thanks again and may 2016 bring you prosperous projects and happy times!

Warm regards,
Stephanie
